MEDIA ADVISORY/NEWS RELEASE

**VALTORC INTERNATIONAL INTRODUCES NEW SERIES FUSIBLE LINK FIRE
SAFE BALL VALVE - FS10 AND FS20 SERIES.**

Valtorc International is proud to announce the latest addition of USA made Fusible Link Valve Packages to our product line - the Series FS10 and Series FS20.

Fusible Link Packages are used in all industrial applications requiring a fail safe, fire safe way to shut down pipelines in cases of fire and to prevent liquid damage. The Fusible Link Valve series by Valtorc International is designed for automatic shut off in case of a fire preventing dangerous or flammable material from entering the pipeline. Valtorc's (FM approved Link) Fusible Link Valve series is the safest and most secure choice and sets the standard in quality and reliability all with unbeatable pricing and fast delivery.

All Valtorc USA made Fusible Link Packages are manufactured and tested in our state of the art industrial manufacturing facility in Georgia, USA.

Let Valtorc International protect your plant with our new Fusible Link Valve Series – use Valtorc's industrial grade fire safe and certified ball valves or let Valtorc custom fabricate your existing valve set up.
